PROFESSIONAL SUMMARY

AI/ML fresher (B.Tech, Artificial Intelligence and Data Science) with hands-on experience building Python-based machine learning, NLP, and AI-powered applications. Skilled in classification, semantic similarity, model evaluation, and application development using Scikit-learn, Streamlit, and React. Seeking AI/ML Engineer, AI Engineer, or Data Scientist opportunities.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

Machine Learning: Scikit-learn, Logistic Regression, Random Forest, Model Evaluation, Cross-Validation

NLP: Semantic Similarity, Sentence Transformers, Skill Matching

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

Web/Development: React.js, Streamlit, Flask/Django, REST APIs

Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel

SOFT SKILLS

Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Time Management

PROJECTS

Resume → Job Match Analyzer

Python, NLP, Streamlit

- Built an NLP-powered Streamlit application for resume–job matching using semantic similarity and skill analysis.
- Designed a weighted scoring framework combining semantic similarity (60%), skill coverage (30%), and experience match (10%) to calculate resume–job alignment.
- Implemented ATS-style compatibility analysis, missing-skill identification, personalized improvement suggestions, and downloadable PDF reports.

Customer Churn Prediction

Python, Scikit-learn, Pandas

- Built and compared Logistic Regression and Random Forest classifiers on the Telco Customer Churn dataset (7,032 cleaned records, 19 features)
- Achieved 83.6% ROC-AUC with Logistic Regression and 81.4% with Random Forest, using 5-fold cross-validation for model validation.

AI Resume Builder

React.js, Tailwind CSS, Vercel

- Developed a React-based resume builder with four templates, AI-assisted content generation, real-time preview, and responsive UI.
- Implemented resume scoring, AI-assisted summary/skill/project suggestions, and PDF generation using React PDF Renderer.
- Deployed the application to Vercel with browser-based Local Storage for persistent resume data

EXPERIENCE

Alfido Tech — Artificial Intelligence Intern

- Applied YOLOv9 and computer vision techniques to support AI-based application development.
- Developed and evaluated AI/ML solutions through structured, task-based projects

RISE Internship — Programming Intern

- Developed Python applications for web development, APIs, and data processing using Flask/Django
- Implemented backend logic and database integration

Garuda Aerospace — Research Intern

Worked on YOLOv9 and computer vision concepts for AI-based applications.

- Assisted with data preprocessing and Python-based tasks supporting AI application development.

Internz Learn — Data Science Intern

- Reduced data project delays by 20% by streamlining project management processes.
- Improved operational efficiency by 15% by applying data-driven insights across teams.

EDUCATION

B.Tech, Artificial Intelligence and Data Science — Agni College of Technology

2022 – 2026

CGPA: 8.3 / 10
